ABOUT US

K.G.N Engineering Is One Of The Leading Manufacturers Of Material Handling Equipment, Industrial Canteen, Pharma And Hospital Trolleys.

Se Was Started In 2009 With Zero Investment, The Company Is Specialized In Fabrication Of SS & MS

SE Equipment Will Help You Design A Solution For Efficiency And Productivity In Your Specific Task

Our Manufactured Products Are Custom-crafted. High-end Modules That Include Unique & Flexible Features To Meet Specific Requirements Of The Clients.

Why Material Handling Equipment Required.

In a manufacturing concern the product are received, stored to the production departments, moved from machine to machine and processing form dept. to dept. and further moved to final assembly section. the final products are then moved to inspection dept. and then to dispatch section.

Thus in every manufacturing organization material handling, place an important role. every where there is movement of

material, work in progress or finished product.

it is highly pointed out that the cost material handling involves 30% to 40% total production cost. therefore considerable attention must be taken in the material handling, improved material handling system not only save time and cost reduction but also ensure the following :-

- * Reduction in accidents.
- * Greater job satisfaction.
- * Reduction in inventory or & work in progress.
- * Increasing production.
- * Saving time.

Infrastructure :

The company is located at begur and the unit is equipped with sophisticated machineries such as hand sheering, Tig Welding Machines, arc welding machine, fly press, buffing machine etc.,

Our Vision :

Our vision & motto is to give quality product with new innovations & service with the help of modern technology at very competitive price to satisfy our existing customers and to retain them all the time with us.

Business Specifics :

Based At : Bangalore, Karnataka (INDIA)

Legal Status : Proprietorship

Company Profile : Manufacturer, Supplier, Service Provider
